Application assessment

Prepared 16 Sep 2026, 11:56 | Dairy business

More information needed

SYNTHETIC DEMONSTRATION. Only the supplied example story is used; no income, sales, costs or payments were supplied. This is not a real applicant or lending decision.

Applicant: Illustrative example

This report supports human review. It is not a lending approval, credit-risk probability or prediction of business growth.

REQUESTED PRINCIPAL	MONTHLY INSTALLMENT	REPAYMENT TERM
INR 10,000.00	**INR 888.49**	**12 months**

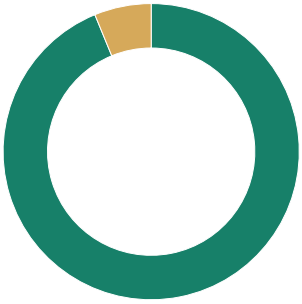
Information required

- Provide declared monthly income in INR.

- Provide existing monthly debt installments in INR.

- Provide both monthly business revenue and monthly operating costs to calculate business cashflow. Enter zero explicitly where appropriate.

Scheduled repayment composition



PRINCIPAL

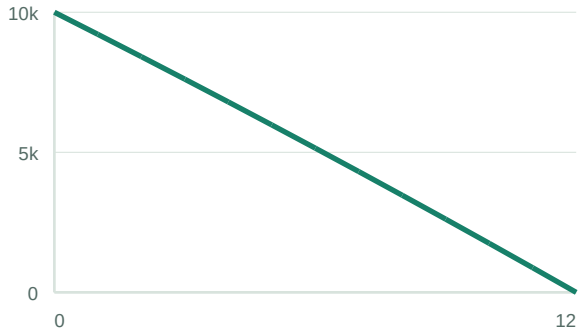
INR 10,000.00

INTEREST

INR 661.86

No fees or insurance are included.

Scheduled outstanding principal



Installment month | INR

Total scheduled repayment: INR 10,661.86. Interest: 12% annual nominal under the demonstration policy.

Financial basis and policy

Every calculation starts with an explicit declaration. Missing figures remain unavailable.

Financial input or calculation	Amount / value
Declared monthly household income	Not provided
Existing monthly debt installments	Not provided
Monthly business revenue	Not provided
Monthly business operating costs	Not provided
Annualized business revenue	Not provided
Annualized operating surplus	Not provided
Annualized surplus less new-loan installments in the first year	Not provided

Monthly income and installments

Income or installment information is missing.

Configured demonstration policy

Illustrative 12% annual nominal interest, 12 monthly installments (configured default term), and total monthly debt installments at most 40% of declared monthly income. Allowed term range: 1-360 months.

Operator-configured academic demonstration policy; no lender policy supplied

Excludes fees, insurance, penalties and unreported expenses. A lender must verify income, obligations, product rules and documents. No approval or risk probability is produced.

Business figures are annualized only when both monthly revenue and operating costs were explicitly supplied. Annualization is multiplication by 12; it is not a forecast of growth.

Rule trace and source evidence

The explanations below show exactly why the review status was produced.

Requested principal | PASS

Value supplied; documentary verification is still required.

Declared monthly income | MISSING

Missing information is not replaced by a default.

Existing monthly debt installments | MISSING

Missing information is not replaced by a default.

Purpose classification | PASS

Classification organizes relevant evidence and does not affect a risk score.

Declared business cashflow | MISSING

No business income or profit projection can be calculated from a business description or market price alone.

Total installment burden | MISSING

Income, principal and existing obligations are needed to calculate this ratio.

Relevant dataset context

Supplied historical LendingClub sample

135 matched records | Loan-purpose category only; different population from this application

135 sampled records have purpose small_business. These records provide taxonomy/context only; their rates and outcomes do not set this applicant's terms or risk.

Supplied dairy_dataset.csv

26 matched records | State-level fallback: Karnataka; no city-level match for Bengaluru

Observed source context only. These prices/records do not supply business quantity, costs, profit or growth for the applicant.

Historical source median: INR 58.03. Unit: INR per source unit (liters/kg); exact product unit not standardized. This value was not used to invent sales or profit.

Declared inputs and provenance

User-entered values take precedence over narrative extraction. The original category remains in the application record. No inferred field is a verified fact.

Field	Value	Origin
Requested principal	INR 10,000.00	narrative extracted
Repayment term (months)	12	configured policy default
Declared monthly income	Not provided	missing
Existing monthly debt installments	Not provided	missing
Monthly business revenue	Not provided	missing
Monthly business operating costs	Not provided	missing
Loan purpose	Dairy business	narrative extracted
Business locality	Bengaluru	narrative extracted

Interpretation limits

- No lending approval, repayment probability or poverty-impact estimate is produced.

- Excludes fees, insurance, penalties and unreported expenses. A lender must verify income, obligations, product rules and documents. No approval or risk probability is produced.

- Only explicitly supplied financial values are used. No business growth, yield, quantity or margin is inferred.

- Historical dataset context is separate from this applicant and does not establish actual outcomes.

Scheduled installments

This is a prospective amortization schedule. It is not a record of payments received. Final installment rounding reconciles principal to zero.

Month	Payment (INR)	Principal (INR)	Interest (INR)	Balance (INR)
1	888.49	788.49	100.00	9,211.51
2	888.49	796.37	92.12	8,415.14
3	888.49	804.34	84.15	7,610.80
4	888.49	812.38	76.11	6,798.42
5	888.49	820.51	67.98	5,977.91
6	888.49	828.71	59.78	5,149.20
7	888.49	837.00	51.49	4,312.20
8	888.49	845.37	43.12	3,466.83
9	888.49	853.82	34.67	2,613.01
10	888.49	862.36	26.13	1,750.65
11	888.49	870.98	17.51	879.67
12	888.47	879.67	8.80	0.00
Total	10,661.86	10,000.00	661.86	0.00
